

The AIChE Netherlands / Belgium Section
is pleased to invite you to attend the Lecture Dinner Meeting

INCONTROL: BYPASS MANAGEMENT HAS NEVER BEEN SO EASY

by Nico Van Hoorebeke, CEO, Intation

Tuesday, May 29, 2018 – Golden Tulip Zoetermeer

Program

18.00 – 18.30	:	Registration & Cocktails
18.30 – 19.30	:	Lecture
19.30	:	Dinner

Summary

Safety is one of the main topics at each chemical production plant, but this conflicts sometimes with maximized production uptime. In certain circumstances, technical or process related, safety signals (interlocks) need to be bypassed to prevent production downtime. Following the international safety standard IEC 61511, certain actions need to be performed in these situations.

How are these bypasses handled at this time? Is there a way to verify (human errors)?

Is everyone following the instructions? Do you have statistics on these bypasses? Is this information automatically up to date?

Are these bypasses periodic? Should the automation software being adapted?
Time for change!

Professional background of the speaker

Nico Van Hoorebeke started working in Automation since his graduation in 1996. First, he worked as a PLC engineer where after 4 years he made the switch to DCS systems. Because of this he has now 18 years of experience in the (petro-) chemical and pharmaceutical industries.

From 2000, he worked as a project engineer, but systematically he climbed up in the organizations to consultant process control and head of automation, where his main customers were located in the Port of Antwerp. However, he was also relocated to the US for 2 years for a big pharmaceutical project.

Since 2010 Nico Van Hoorebeke is CEO of Intation, which he founded with 2 other partners. Intation is growing step by step and changed its focus from Automation to Integrated Automation, this to maximize the business performance of Intation's customers.
